

Dear Parents & Guardians,

Thank you for taking a few minutes to read this important letter. You've received it because your child may be eligible to participate in the 1Million Project (www.1millionproject.org), a free program through their high school. The 1Million Project is a bold mission to provide 1 million mobile devices and high-speed internet access to 1 million high school students across America who do not have reliable internet access at home.

Success in high school today requires reliable 24/7 Internet access in order to complete homework assignments, communicate with teachers online, look-up information for research papers, and much more. The 1Million Project will provide the connectivity your child needs in order to succeed in school by offering a free wireless device and unlimited monthly data, including 3GB of high-speed internet connectivity, during the time they are in high school (for up to four years).

There is absolutely no cost to you, your child or your school to participate in the 1Million Project, and all we need to get your child started is their name and limited demographic information. We never collect your address or any other information about you or your family.

We know you care deeply about your child and are working hard to help them achieve a promising future. We get it. Most of us here at the 1Million Project are parents too, and, like you, we think day and night about how best to prepare our children for what's ahead.

Also like you, we believe in hard work and in potential. We believe all students, like yours, are curious, want a brighter future and are willing to work hard to earn it. We also believe students deserve access to the right tools to achieve success. We believe potential is everywhere, but opportunity is not.

These beliefs are why we're working with your high school to offer the 1Million Project. Your child's future will be brighter if they have the tools and access they need to succeed. And we're here to help. We promise not to be pushy about Sprint's products despite their incredible support for this program – that's not our aim here. Our genuine goal is simply to help your child achieve their full potential by using their 3GB's of high-speed data every month to crush their homework, do their research projects, study for the SAT on Khan Academy's free website, etc. The sky's the limit for your child!

We hope you are supportive of your child participating in this program. Please feel free to contact your school directly with any questions or concerns.

Warm regards,

John Branam
