## Telephoto Lens

Attaches to Padcaster mount for iPad.

The Padcaster 2x Telephoto Lens provides twice the magnification of the standard iPad lens' field of view. The 58mm rear thread attaches directly to the Padcaster lens bracket, and you can use additional 62mm filters in front of the lens as well.

## Padcaster Universal Stand with Greenscreen clamp

The Padcaster Universal Stand with Greenscreen clamp is an easy to use support system for your Padcaster Green Screen or mobile lighting system.

Made of aluminum, the Padcaster Universal Stand and clip are both sturdy and lightweight. Simply extend the stand to its desired length, deploy the legs and attach your greenscreen with the included clamp.

To use as a standard light stand, remove the reflector clamp and mount your light to the attached 1/4-20 screw stud. Comes with a zipper carry bag for protection and portability. The stand weighs three pounds and has an adjustable height ranging from 30" to 90".
